# SIGINAM VENKATA KRISHNA

**FULL STACK DEVELOPER | JAVA • SPRING BOOT • ANGULAR**

7386189405 | venkatakrishnasiginam4@gmail.com
Bangalore, India | LinkedIn: Venkata Krishna Siginam | GitHub: Venatakrishnahub

## PROFESSIONAL SUMMARY

Dedicated Full Stack Developer with hands-on experience developing and maintaining web applications using Java, Spring Boot, REST APIs, Angular, JavaScript, and relational databases. Experienced in responsive UI development, backend API integration, form validation, troubleshooting, and enterprise application workflows. Familiar with the software development lifecycle (SDLC) and focused on delivering clean, maintainable code.

## TECHNICAL SKILLS

| | |
|---|---|
| **Backend** | Java, Spring Boot, REST APIs, Python, Django, FastAPI, Flask |
| **Frontend** | Angular, TypeScript, JavaScript, React, HTML, CSS |
| **Database & Tools** | MySQL, ERPNext, GitHub |
| **Development** | API integration, responsive UI development, form validation, debugging, workflow automation, problem-solving, teamwork |

## WORK EXPERIENCE

**Software Developer (Full-Stack ERPNext Developer) — E2E Rosh IT Solutions, Bangalore, India** **May 2025 – Present**

- Developed and implemented multiple UI modules in Angular for Claims and CMS platforms, ensuring responsive, clean, and user-friendly interfaces.
- Integrated complex Java Spring Boot backend APIs with Angular components to enable real-time data updates, form submissions, dashboards, and report views.
- Built core CMS features such as the Doctor Master, Dashboard, and several configuration pages, improving data accuracy and admin productivity.
- Implemented Claims application features including Dashboard, Target Master, Agent Claim View Form, and other forms with complete frontend logic and validations.
- Independently fixed UI bugs, API integration issues, validation errors, and layout problems, improving the stability and speed of both applications.
- Collaborated with QA and Backend teams to identify issues, push hotfixes, and enhance user experience across modules.
- Customized multiple ERPNext modules including Delivery Note, Sales Order, Invoice, Doctor Master, and Contract Management, automating workflows and improving business operations.
- Developed and integrated REST APIs for external applications to interact with ERPNext, enabling seamless document creation, updates, and validations.
- Diagnosed and fixed ERPNext issues such as docstatus errors, duplicate data, email triggers, validation failures, and PDF generation problems.
- Automated backend workflows such as invoice submission, email notifications, onboarding flows, and document processing, reducing manual work by 30%.
- Created dashboards, filters, reports, and doctypes based on real-time business requirements.

**Client Project: Tobacco Board HRMS (Ongoing) | Client: Tobacco Board | On-site at client location**

- Working on-site at the client location as part of E2E Rosh IT Solutions, contributing to the development of the Tobacco Board HRMS application (currently in development) using Angular and Java/Spring Boot backend APIs.
- Enhance employee details forms and document-upload workflows, including file format/size restrictions and UI-level validations.
- Support workflows related to payroll, promotion, posting updates, and suspension processing, and troubleshoot UI/API integration issues.
- Integrate frontend screens with backend APIs and verify employee information and updates are displayed correctly across forms and views.

**Associate Software Intern — Simtekway Solutions, Bangalore, India** **Feb 2024 – Jun 2024**

- Learned and applied Python, HTML, and CSS fundamentals, including syntax, data structures, control flow, and core web development concepts.
- Practiced responsive, user-friendly interface development and continued improving front-end and back-end fundamentals.
- Developed an e-commerce website with shopping-cart functionality, including plus/minus controls to adjust product quantities dynamically.

## PROJECTS

**Chatbot for 5th–12th ICSE Syllabus**

- Designed and developed an interactive conversational AI chatbot using Flask, JavaScript, and the OpenAI API for students in grades 5–12.
- Built the interface with HTML and CSS and implemented API interaction and response handling for syllabus-based questions.
- Deployed the solution end-to-end to support reliable student engagement.

**Antenna Design Project**

- Engineered a multi-band Ku-band antenna (12–18 GHz) aimed at supporting downlink communications in space systems.
- Designed and optimized antenna hardware and evaluated performance for signal reliability and bandwidth efficiency.
- Applied practical knowledge of RF communication, space communication systems, and antenna design principles.

## EDUCATION

**Bachelor of Engineering – Electronics Communication** **Sep 2019 – Aug 2023**

Prathyusha Engineering College, Tamil Nadu

**Intermediate (MPC)** **Jul 2017 – May 2019**

Viswasai Junior College, Nellore (AP)

## CERTIFICATIONS

- Python Full Stack Certificate — Quality Thoughts, Hyderabad
- MySQL Certificate — Prathyusha College, Chennai
